BM&T launch new office to focus on CEE and Romanian restructuring market

11 March 2016

Leading turnaround boutique BM&T has opened a new Romanian office in conjunction with local firm Nichifor Consulting.

BM&T, an award-winning organisation of senior turnaround management, restructuring and business improvement professionals, launched its new office at a series of business meetings with leading turnaround professionals, bank officers and companies in Bucharest.

Its Romanian office is being led by Catalin Nichifor, who founded Nichifor Consulting in 2014. He has been involved in various multi-million turnaround projects and has extensive experience in financial and turnaround management in Romania and in the CEE region.

Joanne Holland, Managing Partner Business Development for BM&T, who has been working closely with Catalin over the launch in Bucharest to showcase what the firm can offer to potential business partners, said it was a great opportunity to expand and develop its work in Central and Eastern Europe.

Jo added: "This is an exciting time for BM&T to be able to use our turnaround and performance improvement skills in Romania to support the progress of Romanian companies at a time when the Romanian market is up and coming in the CEE region."

BM&T is a founding member of European Restructuring Solutions, a network of firms in the five major economies of Europe. It is also a European associate of leading US restructuring firm Conway Mackenzie.

In 2013 and 2015 BM&T received TMA Europe's Turnaround of the Year Award, and in 2014 Managing Partner and Chairman Alan Tilley was presented with the TMA Chairman's Award at the annual global conference of the TMA in recognition of his contribution to the international turnaround industry. He also won industry awards for his work in 2010 and 2011.
